

# *Escape The Java Trap!*

## *Free Software solutions at FOSDEM*

*21 & 22 February, 2004*  
*Room 1302, "Depage", Building H*

*Université Libre de Bruxelles*  
*Campus du Solbosch*  
*Avenue Franklin D. Roosevelt 50*  
*B-1050 Bruxelles*

### *Saturday afternoon*

**14h00 - 14h50**

GNU Classpath -- Core Classes for a Diversity of Free Java Virtual Machines  
GNU Classpath overview and free applications/runtimes show.  
*Sascha Brawer and Mark Wiegaard*

**15h00 - 15h50**

SableVM - the Apache of Java Virtual Machines  
On technical solutions and motivation behind the SableVM Project.  
*Grzegorz B. Prokopski*

**16h00 - 16h50**

fbAWT - Direct to your buffer  
Slim Abstract Window Toolkit implementation written in java that  
doesn't use any peer widget library, but has direct access to  
either a linux framebuffer or a VNC server backend.  
*Stephane Meslin-Weber*

### *Sunday morning (Debian talks)*

10:00-11:00 Fabio Massimo Di Nito: Packaging Apache for Debian  
11:00-12:00 Wouter Verhelst: A practical guide to using buildd  
12:00-13:00 Martin Michlmayr: Dak, the Debian Archive Kit

Also Sunday morning - Official java tracks on JOnAS, GCJ and NetBeans  
See <http://www.fosdem.org/2004/index/schedule>.

### *Sunday afternoon*

**14h00 - 15h50**

Packaging Free Java Applications For Free Operating Systems  
Comparing different packaging projects like Debian, Gentoo, RHUG/Naoko and JPackage, and .deb best  
practises. See also the Wiki: <http://java.debian.net/index.php/CommonJavaPackaging>  
*Dalibor Topic and Arnaud Vandyck*

**15h00 - 17h00**

Open discussions/Free slots/Combined talks  
- GNU Classpath 1.0 Roadmap  
- Free VM/Compiler integration/cooperation  
- Standardization and compatibility issues
